

Pressure and Level Transmitter

Series 050D

The new series 050D Pressure / Level Transmitter

Easy parameterizing, calibrating, measuring.
The new pressure transmitter series 050D with easy 2-button-concept and 2 clamps for quick output signal measuring during process conditions.

Features

- easy calibration, even without disconnecting the transmitter by switchable power supply – system power supply / calibrator supply
- TurnDown 4
- accuracy $\leq \pm 0,2\%$ FS
- easy parameterization by 2-button-concept and multicoloured status-LED
- output signal 4...20 mA, 2-wire
- hygienic design, IP67 and IP69K
- measurement ranges from -1/1bar up to 100bar
- modular and fixed connection, e.g. PZM, VARIVENT®, Clamp, G1" elastomic free sealing cone, ...

Applications

- pressure and level measurements in tanks and pipes without special requirements
